ALBUQUERQUE, N.M. — A-Tech Corporation, d.b.a. Applied Technology Associates (ATA) has been awarded a \$13,685,414 cost-plus-fixed-fee completion task order contract (FA9453-18-F-0003). This task order contract provides for required research and development in basic physics, engineering, design, development, integration, technical analysis, and testing. Work will be performed at Kirtland Air Force Base, New Mexico, and is expected to be completed by December 18, 2020. The Air Force Research Laboratory (AFRL), Kirtland AFB, New Mexico, is the contracting agency.

"ATA is proud to support AFRL's Research and Development (R&D) efforts. These R&D efforts support our strategy to continue to push technology advancements in support of our warfighters," said ATA's President, Dan Gillings.

ATA is an award-winning, small business providing high performance, state-of-the-art custom solutions, technical services; and assembly, integration, and test capabilities for ground, air, and space applications. The company specializes in line of sight stabilization, inertial sensing, and real-time processing systems for government and commercial customers. For more information about ATA, please visit www.atacorp.com.

Any opinions, findings and conclusions or recommendations expressed in this material are those of ATA and do not necessarily reflect the views of the AFRL.
